

The Environmental Policy provides ELSYS with a framework to make continual improvements in all environmental aspects of our business. With this deliberate Policy, we shall make our best efforts to minimize our climate footprint and protect the environment.

Firstly, the environmental work follows applicable environmental legislation, regulatory, and compliance obligation where minimum requirements are always strived to be exceeded when appropriate. Secondly, our business culture permeates systematic recycling thinking. All business activities shall revolve around improving our operations from an ecological viewpoint by prioritizing environmental aspects in the day-to-day work. Lastly, improving our business performance will create opportunities to allocate further resources toward environmental activities.

Also, one central part of our business focus is to absorb existing resources within the business, including all stages of activities, from financial, natural, and human resources. Furthermore, optimization of our processes to manage our climate footprint through the product life cycle and continuous search for materials considered more durable and environmental-friendly. Through diligent work with the Environmental Policy, hopefully, future generations can be benefited by us reducing our climate footprint.

We are committed to making continual improvements in our environmental performance. In conjunction with the Policy has, solid objectives been identified for the fulfillment of the Policy. For compliance, shall the goals be continuously revisited and revised if needed. The Environmental Policy will be communicated to all employees and available to the public and stakeholders through our website.
